SAVINGS OBJECTIVE ANALYSIS:

TASK 4:

INVESTMENT DURATION ANALYSIS:

TASK 5:

REASON FOR INVESTMENT ANALYSIS:

TASK 6:

SOURCES OF INFORMATION ANALYSIS:

TASK 7:

DASHBOARD DEVELOPMENT:

BUSINESS INSIGHTS (TASK 1):

- 1. The dataset consists of 2,000 investor records, offering a comprehensive overview of investment preferences.**
- 2. KPI cards summarize investor characteristics, including average age, investment amount, portfolio value, and returns.**
- 3. The Investment Preference chart highlights the most popular investment avenues.**
- 4. The Savings Objective chart identifies the primary financial goals of investors.**
- 5. The Age Group chart shows the distribution of investors across different age categories.**
- 6. The Risk Profile chart illustrates the proportion of low-, medium-, and high-risk investors.**

INTERPRETATION / BUSINESS INSIGHTS (TASK 2):

- 1. The clustered column chart compares investment preferences between male and female investors.**
- 2. Both genders show strong interest in Gold and Equity.**
- 3. Female investors tend to have a slightly higher preference mutual fund and gold**
- 4. Male investors show a comparatively higher inclination toward Equity, reflecting greater willingness to invest in higher-risk assets.**
- 5. The gender distribution chart confirms that both genders are well represented in the dataset, making the comparison meaningful.**

BUSINESS INSIGHTS (TASK 3):

- 1. Education and Tax Savings are the most common savings objectives among investors.**
- 2. Investors aiming for Wealth Creation generally prefer Mutual Funds and gold, indicating a higher appetite for long-term growth.**
- 3. Investors saving for Retirement show a stronger preference for Gold, Fixed Deposits and Government Bonds, reflecting a conservative investment strategy.**
- 4. The analysis demonstrates that investment preferences vary according to financial goals, emphasizing the importance of aligning investment products with individual objectives.**

BUSINESS INSIGHTS (TASK 4):

- 1. The majority of investors prefer medium- to long-term investment durations (3–5 years), indicating a focus on sustainable wealth creation.**
- 2. Monthly and Quarterly monitoring is the most common frequency, suggesting that investors prefer periodic portfolio reviews rather than daily tracking.**
- 3. Monitoring frequency reflects different investment behaviors and risk appetites, highlighting the importance of personalized investment strategies.**

BUSINESS INSIGHTS (TASK 5):

- 1. Better Returns is the primary motivation for most investors, showing that maximizing returns is a key financial objective.**
- 2. Wealth growth is another major reason, reflecting a long-term investment mindset.**

BUSINESS INSIGHTS (TASK 6):

- 1. The Internet is the most common source of investment information, reflecting the growing use of digital platforms for financial knowledge.**
- 2. Financial Advisors remain an important source, particularly for investors seeking professional guidance.**
- 3. Friends and Family also influence investment decisions, demonstrating the role of personal recommendations.**
- 4. Different information sources influence different investment avenues, highlighting the importance of financial awareness and accessibility.**
